

Brush Chipper

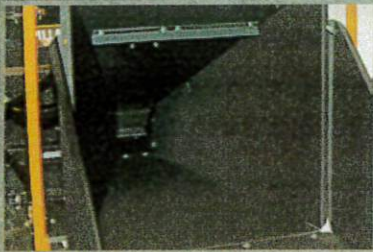

FEATURES

- Direct hydraulic drive and fly-wheel design make for low maintenance and efficient chipping
- Hydraulic feeding system and large opening make for safe, easy loading of brush and limbs
- Independent hydraulic feed system controls allows user complete control of feeding rate into the chipper
- Large, easy-to-grab, convenient safety shut-off grab bar gives user control of the feed system at all times
- Fast and easy chute rotation gives 360 degree control to effectively direct chip discharge
- Two universal skid steer attach plates on two sides of the chipper allow skid steer to be attached either perpendicular or parallel to chipper for best maneuverability in even the tightest locations

Chips Away...

Turn your skid steer into a mobile work station. This attachment is ideal for commercial, residential, orchards, golf courses, etc., – any place where you need to turn a pile of branches into a pile of chips. Easily placed into backyards and remote areas without creating damage to yards.

Hydraulic feeding system makes chipping much easier by crushing in the side branches.

Hand crank controls the speed of the hydraulic feed system which determines the rate at which the operator feeds the material.

Built-in hydraulic jack makes feed roller maintenance quick and easy.

Fast, easy chute rotation of 360°.
