

TOUGHER • STRONGER • BUILT TO LAST

E-Z MODEL B CRUSHER

These crushers are solidly built and dependable with a unique hydraulic system that gives you maximum power when you need it the most.

The hydraulic cylinders are uniquely mounted on the bottom deck of the unit. This means the hydraulic cylinders "pull" rather than "push" the crusher deck down. This puts less stress on the machine. At the point of greatest resistance, the cylinder is at its strongest position

Each cylinder can be operated independently, providing more leverage and maneuverability. The pressure is adjustable - you have a safety relief valve built into each cylinder, preventing possible damage to the cylinder.

All models can be portable or stationary.

**Perfect
for
salvage
yards!**

SPECIFICATIONS

Opening:

Length	20'
Width	7'6"
Height	7'2"

Overall:

Length	40'
Weight	47,000 lbs.
Height	13'3"

Hydraulics:

Pressure	2,400 psi
Port Reliefs	2,700 psi
Cycle Time	45 Seconds
Cylinders	8" Bore
Travel	72"
Shaft	2.5" Rod
